About

The ATR is flown throughout the real world. It is popular with airlines and passengers alike. We have built a great virtual model and are trying to raise the funding that will allow us to continue its development and deliver a super addon for the XP-11 flight simulator platform.

Your pledge will help us cover the costs of, among others, systems translation from P3D, Max to blender conversions, creation of custom datarefs, ACF's, and all the other elements of XP development.

Please note that the top two reward tiers guarantee you the product (i.e. you will not have to purchase the ATR again).

For the lower two levels, a discount equalling your pledge will be applied to the released purchase price if you decide to buy the product after release.

Risks and challenges

We would love to bring this plane into XP11. however the challenge for us is that all our expertise is in

Prepar3D. It is not just a simple matter of just porting the model over - everything works differently. By pledging you are showing us that there is a market for this aircraft in XP. Your funding will enable us to tackle the hurdles associated with creating an exceedingly complex aircraft in a new platform.
