10. The Author reserves the right, at their sole discretion, to modify or replace this Agreement at any time. If a revision is material, we will provide at least 14 days' notice prior to any new terms taking effect. What constitutes a material change will be determined at our sole discretion.

ABOUT

The North Liberion Aviation P-51 was originally designed for a Britannian Air Force requirement, but the Liberion Army soon recognized the potential in this airframe.

Entering service shortly before the return of the Neuroi's and the outbreak of the Second Neuroi War, it has been rapidly and significantly improved. The P-51D offers increased engine performance and firepower in the ongoing fight against the unknowable enemy.

This airframe is assigned to the 363rd Fighter Squadron, 357th Fighter Group, Eighth Air Force deployed from Liberion to support combat operations in Europe. It is the personal mount of Flying Officer Charlotte E Yeager when she is not utilizing her Striker Unit.

PILOTS NOTES

So this was a fun little diversion project.

In an alternate reality, the Great Wars of the 20th Century never occurred. Instead humanity was united against an alien threat. Mankind did what it could to stem the tide, but it was young women with magical powers that would turn the tide in favour of humanity.

After completing the Spitfire project in this universe, I wondered what other aircraft I could paint with these themes. Turned out with the release of the Reno expansion I could make Shirley's Mustang!

Thank you for supporting my work and keep an eye out on my website and my Facebook page for any updates to this product and the future releases.

I hope you enjoy this aircraft and would love to see it in action! Join fellow aviators in our community [Discord](#) and share your thoughts and experiences there!

ABOUT THE ARTIST

I have been around aviation for longer than I care to remember. Whilst my own professional piloting dreams were crushed through medical restrictions, instead I have found ways to become active in the aviation world, both real and virtual. I currently work in the training space, providing training solutions and content to the Aviation and Defence sectors while simultaneously working with a range of high-quality developers across the home user market.

I first started experimenting with creating textures for HAWX following many years building plastic scale models. From very humble and basic beginnings, I have slowly grown my skills and content. I have created texture sets for all the major flight simulation platforms, as well as arcade style titles and professional training software for over a decade. My content can be found in virtual hangars all around the world as well as supplying content to professional training organizations and add-on developers.

As well as uploading freeware content, I have a range of content available for sale and I am available for commission work. My Commission status and rates are generally available in my Community [Discord](#). Head over to my [website](#), [GumRoad](#) store to check out my other work; or reach out and get in touch if you have a specific project in mind.

It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better.

The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat.

~ Theodore Roosevelt
