## ABOUT

Due to the nature of the way the DA62 Improvement Mod has redone the panel and systems of the aircraft it requires some additional work to make these livery packs compatible. Most likely it will be noticed either by loss of systems or functionality in the cockpit or failure to load into sim after selecting the aircraft.

This affects all except my Gold liveries, as they do not require the registration colour to be changed in both the Desire and Delight (Curved) livery packs. Unfortunately, that also becomes part of the solution, and users of the Improvement mod must choose to either have black or white registrations on all DA62 liveries.

To implement this work around you will need the following:

- Text Editor (recommend Notepad++)
- Knowledge of your Community Directory Location

# INSTRUCTIONS (OPTION 1)

This option sets all registrations to use the default black font colour.

1. Close MSFS if running
2. Navigate to the Livery folder at \Community\n24-aircraft-da62-livery-delightcurved\SimObjects\Airplanes\N24-da62-delightred\ and open the aircraft.cfg with a text editor

<< n24-aircraft-da62-livery-delightcurved > SimObjects > Airplanes > N24-da62-delightred

3. Locate the line panel = “delightred” and delete delightred.

The final result should look like this:

panel = “”

4. Save and close the aircraft.cfg

# INSTRUCTIONS OPTION 1 (CON'T)

5. Repeat this process for the remaining liveries (not including desiregold or delightgold)
6. Launch the sim and enjoy the liveries, but with Black Registrations

# INSTRUCTIONS (OPTION 2)

This option sets all registrations to use white font colour. This includes all liveries NOT covered by this pack INCLUDING Default liveries.

1. Close MSFS if running
2. Navigate to the DA62 Improvement Mod Panel folder at \DA62X\SimObjects\Airplanes\Asobo\_DA62\panel\ and open the panel.cfg with a text editor

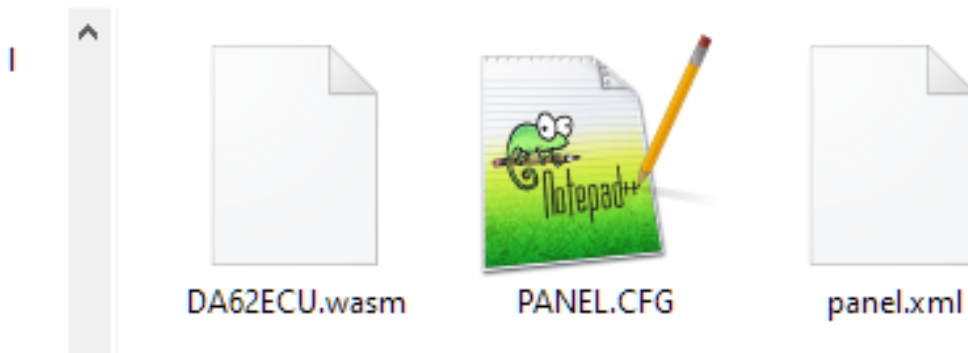

# INSTRUCTIONS

## OPTION 2 (CON'T)

NOVEMBER 24

Community > DA62X > SimObjects > Airplanes > Asobo\_DA62 > panel

3. Locate the section:  
[VPainting01]

Replace font\_color=black with  
font\_color=white

The final result should look like this:

```
[VPainting01]
size_mm           = 2048,512
texture           = $RegistrationNumber
location          = exterior
```

```
painting00=Registration/Registration.html?font_color=white,
0, 0, 2048, 512
```

4. Save and close the panel.cfg

5. Launch the sim and enjoy these liveries  
(and every other DA62 livery) with White  
Registrations

# PILOT'S NOTES

It is unfortunate that despite untold hours of attempts to try and get the registrations to show up correctly while still being able to utilize the Improvement mod have not born fruit.

Whilst inelegant, these two options at least give the community ways to enjoy both the livery packs and the mod together.

Safe Skies

# NOVEMBER 24

*It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat.*

*~ Theodore Roosevelt*
