ABOUT

The Junkers Ju 52 is the very definition of stalwart transportation. From its beginnings as an airliner, it would emerge as a capable military transport and even as a bomber!

Whilst many know of its service with the Luftwaffe, there were many other nations whose armed forces flew the venerable aircraft!

This livery pack includes five examples of the Ju 52 in service with militaries around the world.

BUSHTRIP

Along with the liveries included with this package is a Bushtrip to experience flying this magnificent aircraft! The French produced a licenced version of the Ju 52, known as the AAC.1 Toucan. This would see extensive service with French forces around the world. It was vital for its reliability and ability to get in and out of remote places supporting French troops around the world.

This trip recreates a supply mission between French garrisons in Indo-China during the 1950's.

The Bushtrip can be found under Activites - Custom Content.

The journey begins on the ramp, start the aircraft and begin your flight! (Auto-start of the aircraft is supported)

For the safety of your passengers, don't forget to park and engage the Parking Brake before starting the next leg of your journey.

PILOTS NOTES

The Ju 52 is a true icon of aviation, an airframe that was revolutionary in its design and surprising in its utilitarianism. It is fitting for it to be released as a Legendary aircraft for Microsoft Flight Simulator!

Whilst it is often associated with its German military service, it is often overlooked how many other militaries made use of this airframe around the world.

Thank you for supporting my work and keep an eye out on my website and my Facebook page for any updates to this product and of future releases.

I hope you enjoy this aircraft and would love to see it in action! Join fellow aviators in our community [Discord](#) and share your thoughts and experiences there!

ABOUT THE ARTIST

I have been around aviation for longer than I care to remember. Whilst my own professional piloting dreams were crushed through medical restrictions, instead I have found ways to become active in the aviation world, both real and virtual. I currently work in the training space, providing training solutions and content to the Aviation and Defence sectors while simultaneously working with a range of high-quality developers across the home user market.

I first started experimenting with creating textures for HAWX following many years building plastic scale models. From very humble and basic beginnings, I have slowly grown my skills and content. I have created texture sets for all the major flight simulation platforms, as well as arcade style titles and professional training software for over a decade. My content can be found in virtual hangars all around the world as well as supplying content to professional training organizations and add-on developers.

As well as uploading freeware content, I have a range of content available for sale and I am available for commission work. My Commission status and rates are generally available in my Community [Discord](#). Head over to my [website](#) or [GumRoad](#) store to check out my other work; or reach out and get in touch if you have a specific project in mind.

NOVAWING24

It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better.

The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat.

~ Theodore Roosevelt
